

Computer Peripherals - Arduino Lab 5

1. Libraries

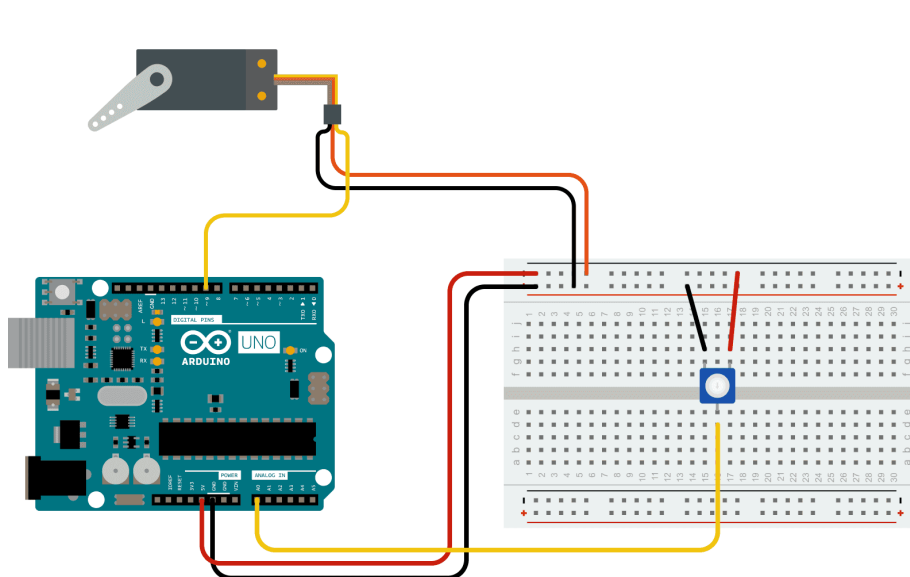

First of all please watch [this](#) brief video introduction about Library, Port Manipulation, Bit Math, Faster PWM/ADC.

2. Introduction into libraries

The libraries usually consists of prewritten code lines and a couple of example sketches. We use them to reuse codes that someone else already made for us.

2.1. The task

Please create the following servo motor control by using the schematic below, then use the Servo library to create a control for it. Check [this](#) link for a hint, and [this](#) link for an arduino servo drive tutorial.

Bibliography

This laboratory guide is based on *GreatScott* Youtube channel contents, for more interesting projects check the channel.
